📊 **Smart Patrol – MVP KPI List**

1. Response Time (Simulation)

- Target: Show reduction compared to baseline patrol routes (e.g., 20–30% faster in demo scenarios).

- Metric: Average simulated time from incident → patrol assignment.

2. Coverage Demonstration

- Target: Ensure patrol suggestions cover ≥ 80% of reported hotspots in demo data.

- Metric: % of demo incidents with a patrol route assigned.

3. Patrol Utilization (Prototype)

- Target: ≥ 70% of patrol units actively assigned in demo runs.

- Metric: Ratio of active vs. idle patrols during simulation.

4. Bias Monitoring (Basic)

- Target: Track distribution of alerts across at least 2 regions (urban vs. rural).

- Metric: Compare false positives in demo datasets.

5. System Auditability

- Target: 100% of AI decisions logged with timestamp + explanation.

- Metric: Presence of logs for every incident processed.
